Full Stack Developer with 2 years of experience *developing* web applications using **Spring**, **Java**, and **Angular** with a focus on developing scalable and well-documented code. Aiming to contribute to building software solutions along with highly performant and dynamic teams. I consider myself a technology and learning enthusiast who loves solving problems with programming. I am looking for a job where I can work with Java and Angular stack remotely.

EXPERIENCE

VANTEK, Full Stack Developer — March 2022 - Current

- Reduced by 30% CSV file processing time by a new recursive algorithm.
- Created and updated mobile applications (Android and iOS), and improved usability by implementing new requirements.
- Reduced by 30% the number of bugs by analyzing and reimplementing old code.

Tech Stack: Java, Spring, Angular, Ionic, and PostgreSQL.

NTT Data, Full Stack Developer — March 2021 - March 2022

- Implemented Middleware to connect the different client's systems, improving the scalability and availability by using microservices.
- Reduced by 10% the webpage's response time by moderated service calls.
- Reduced by 30% environment arming time by updating the documentation.

Tech Stack: Java, Spring, Angular, and SQL Server
